

Join us to celebrate
the fourth PES Day by organising
& participating in activities at your
student branch, section, chapter & region!

Thirteen years ago on 22nd of April, our society was reborn as the 'Power & Energy Society' with broadened horizons and renewed determination to serve not just the present needs, but the needs of the future of the members as well as the society.

On this day in 2022, we celebrate the fourth PES day and April as the fourth PES month, where we celebrate the unity, strength and achievements of the IEEE PES family. Revolving around the PES day, throughout the month of April, we will celebrate the vibrant, rich and proud history of PES running right back to the birth of IEEE in 1884 lead by Thomas Alva Edison.
